SUMMARY

Passionate **MERN Stack Developer** with around 2.5+ years of hands-on experience in developing scalable websites/applications using a wide range of **Front-end and Back-end** skills like **HTML, CSS, JavaScript, ReactJS, NodeJS, ExpressJS, MongoDB**, etc. Well-versed with **Agile** methodologies and adapted complete software development lifecycle (**SDLC**), Understanding Various **Data Structures**. As a UI Developer, I'm experienced in designing and developing responsive and highly functional user interfaces. Proficient in front-end technologies, including modern **JS Libraries/frameworks** like **React** for the front end and **ExpressJS** for the back end. Adept at translating design concepts into **responsive web applications**, with a strong focus on user experience and accessibility.

TECHNICAL SKILLS

| | |
|--------------------------------|---|
| Front-End: | HTML, CSS, Bootstrap, jQuery, React, Redux, Webpack |
| Front-End Tools and Libraries: | Tailwind UI, Formik, React-Bootstrap. |
| Back-End: | Node JS, Express JS, Mongoose, Nodemon |
| DataBases: | MongoDB- NoSQL |
| Languages: | JavaScript, Java(Basics) |
| Version Control: | GIT |

PROFESSIONAL EXPERIENCE

Innovapath IT Solutions Pvt Ltd., Secunderabad, Hyd
Software Developer (Front-End)
Project: TALENTSCREEN

Oct 2022 – Oct 2024

Description: TalentScreen a screening application for candidates and employers. The application is built using MEAN stack. We have used Auth signup and login using Google, Facebook, LinkedIn and GitHub. TALENTSCREEN has backend services in Node.js along with Socket.IO and ZMQ for distributed services. MongoDB and MySQL are the functional databases while Redis is used for caching. The UI of the applications is built using SPA with ReactJS and React-Native (Mobile Applications).

Responsibilities:

- Created dynamic and interactive **SPA (Single Page Application)** using **JavaScript** libraries like **React**, utilizing advanced concepts like **state** management and **data binding**.
- Experience with **React Hooks** including `useState`, `useEffect`, `useRef`, and have knowledge on `useContext`, `useMemo`, `useCallback`, `useReducer`.
- Have understanding of **React Lifecycle Methods**(Class Based Components).
- Worked on **ReactJS** new features like **Error Boundaries, Fragments, Portals, React Router**.
- Hands on with **React Slick** and **React Router**. And used React's dynamic import feature to enable **lazy loading** of route components.
- Used **JSX** with ReactJS for component development to make react look more elegant.
- Used **JavaScript ES6+** Features like Advanced Array Methods and async JavaScript.
- Used **Babel** to transpile **ES6** and **JSX** into JavaScript.
- Used **Redux** for state management and share state between components in projects.
- Worked on styling using **styled-components, Material UI, React Bootstrap**.
- Have Extensive knowledge on **NodeJS, ExpressJS** and **MongoDB**.
- Collaborated with the team for timely delivery of features using **Git** for **version control**.
- Integrated **third-party services** and **APIs** using libraries like **Axios** and **fetch Api** method
- Integrated back-end services with the front-end using **RESTful APIs**, providing users with a seamless and uninterrupted experience.
- I have successfully collaborated with **cross-functional teams** to deliver visually appealing and intuitive **web applications**
- Have Extensive knowledge on **CMS** and working with various tools such as **WordPress** and **Magento**
- Experience with **Agile methodology tools** such as **JIRA** for project management and collaboration.

Environment: HTML5, CSS3, JavaScript, ES6, ReactJS, Redux, NodeJS, ExpressJS, MongoDB, Babel, Axios/Fetch, ESLint, Bootstrap, Material UI, Styled Components, Webpack, JIRA, GIT.

EDUCATION

Osmania University, Hyderabad

June 2022

Bachelor of Engineering — Computer Science & Engineering
